who are we

R. K. STEEL (INDIA) is an establishment of over 25 years of dedication. Established in 1994 the company has now grown to be one of the largest manufacturer of modern architectural hardware in India. ROYAL's Modern state of art manufacturing unit in Rohtak, Haryana is equipped with the latest technology machines and a technically qualified team to meet the increasing needs of the customer.

Over the years ROYAL has excelled in the field of builders hardware providing products like door locks, door handles and various kinds of architectural hardware.

We offer products in a variety of metals and more importantly products can be custom made exactly in accordance with the specification of the customer.

Willingness to provide quality that surpasses customer's expectations at extremely competitive prices is what sets us apart from the competition.

Infrastructure

The Company has its modern manufacturing plant at Rohtak, Haryana. It is equipped with the latest electroplating and electrophoretic lacquering process, forging and power presses, fully equipped tool room, design department and a technically qualified quality assurance team Lock manufacturing is carried out with state of art CNC machines which helps us in getting the best quality products which can match up to international standards All required manufacturing processes under one roof not only helps us on in meeting delivery deadlines buts also gives us a better control on the quality of the final product More importantly our infrastructure not only enables us to work with various metals like zinc, stainless steel, mild steel and aluminium but also helps us to customise the product in accordance with the specific requirements of clients which may be in lines with material, finish or even design We are known not just by the quality of our products, but also for the way we build relations.

m mortise handles
STAINLESS STEEL

ROYAL mortise handles for doors are available in many different styles and finishes. Because of varying design styles, door levers are often handed, meaning we need to know which way our door swings in order for the lever to curve up or down in the right direction on the door.
